

QUALITY STATEMENT

Outcome Health is committed to providing high quality services to the community through its areas of business. This commitment is evident through the implementation of ISO 9001 auditing to ensure high standards are evident and maintained.

Quality Systems are also an integral part of our management programs and are closely integrated. An independent, third party auditor assesses our commitment to Quality through the ISO 9001 standards, the RACGP standards as well as financial auditing occurring each year. The feedback received from these audits provides valuable input to our continuous improvement process. Integrated policies and procedures give assurance that we are able to provide efficient, effective and high quality services.
